OBJECTIVE

AI & Data Science undergraduate with experience in Python, data analytics, and computer vision. Interested in building intelligent systems and data-driven applications using machine learning and modern software tools.

EDUCATION

- **B.Tech – Artificial Intelligence and Data Science** 2023 – 2027
Velagapudi Ramakrishna Siddhartha Engineering College
CGPA: 8.59
- **Intermediate – MPC** 2021 – 2023
Sri Chaitanya Junior College
Score: 961/1000
- **SSC** 2020 – 2021
Ushodaya E.M & T.M High School
Score: 592/600

TECHNICAL SKILLS

- **Programming:** Python, C, R, JavaScript, SQL
- **AI / Machine Learning:** Pandas, NumPy, Matplotlib, OpenCV, Qiskit
- **Data Analytics:** Excel, Power BI, Tableau
- **Databases:** SQL, MongoDB, PL/SQL, SQLite
- **Tools:** GitHub, Visual Studio, Streamlit, UiPath, Unity, Overleaf

CERTIFICATIONS

- NPTEL – Database Management Systems (DBMS)
- Cisco – Python Essentials
- AICTE – Data Engineering Virtual Internship
- Coursera – Introduction to Artificial Intelligence
- WISER – Quantum Fundamentals Program

INTERNSHIPS

Data Analytics Intern – Internship Studio 2024

- Cleaned and analyzed datasets using Python, SQL, and Excel.
- Built interactive dashboards using Power BI and Tableau.
- Generated analytical reports for data-driven decision making.

AICTE – EduSkills Virtual Internship (DSA in C) Jan 2026 – Mar 2026

- Completed a 10-week internship on Data Structures and Algorithms using C.
- Implemented arrays, stacks, queues, linked lists, trees and graph algorithms.
- Developed a capstone project demonstrating algorithm implementation.

PROJECTS

Edge-Based Face Recognition for Patient Identification [GitHub](#)

- Developed a real-time face recognition system using Python and OpenCV.
- Integrated SQLite database for automated patient identification.
- Optimized recognition accuracy and system performance.

Sahya Stream – Donation Management Platform [GitHub](#)

- Developed a secure donation platform with multi-role authentication.
- Implemented fund tracking and approval workflows.
- Built responsive UI using HTML, CSS, and JavaScript.

Quantum State Visualizer [GitHub](#)

- Built an interactive visualization tool using Python, Qiskit, and Streamlit.
- Implemented Bloch sphere visualization for quantum state interpretation.

RESEARCH & ACHIEVEMENTS

- Co-authored research paper titled *Edge-Based Face Recognition for Patient Identification in Government Hospitals*.
- Winner of Error Extermination Extravaganza debugging competition.
- Contributed to organizing national-level hackathon events.

LANGUAGES KNOWN

1. Telugu	★★★★★
2. Hindi	★★★★
3. English	★★★★★
