PROFESSIONAL SUMMARY

Motivated **AI & Data Science undergraduate** with experience in **data analytics, automation (RPA), computer vision, and quantum computing**. Demonstrated strengths in **communication, teamwork, leadership, time management, and analytical thinking**. Committed to delivering efficient, reliable solutions through hands-on projects and industry exposure.

TECHNICAL SKILLS

- **Programming:** Python, C, R
- **AI/ML & Vision:** Pandas, NumPy, Matplotlib, OpenCV, Qiskit
- **Data Analytics:** Excel, Power BI, Tableau
- **Automation:** UiPath (RPA, IDP, Test Automation)
- **Web Development:** HTML, CSS, JavaScript
- **Databases:** SQL, MongoDB, PL/SQL, SQLite
- **Tools:** GitHub, Visual Studio, Unity, Streamlit, Overleaf

PROFESSIONAL EXPERIENCE & HACKATHONS

- **Data Analyst Intern — Internship Studio Tech: Python, SQL, Excel, Tableau, Power BI**
 - Analyzed and cleaned datasets to derive actionable insights.
 - Designed dashboards and visual reports to support data-driven decisions.
 - Collaborated with team members, improving communication and leadership skills.
- **UiPath Hackathon Participant Tech: UiPath, AI, IDP, Automation**
 - Developed automated workflows for resume parsing and job recommendation.
 - Integrated document understanding and validation modules for accuracy.
 - Led team coordination tasks demonstrating teamwork and adaptability.
- **Quantum State Visualizer Tech: Qiskit, Streamlit, Python**
 - Built an interactive tool for quantum state visualization and Bloch sphere rendering.
 - Designed a simplified UI to help users interpret quantum state information.

ACADEMIC PROJECTS

- **Edge-Based Face Recognition System (EPICS Project) Tech: Python, OpenCV, SQLite**
 - Developed a lightweight real-time face recognition system for patient identification.
 - Integrated SQLite databases to automate patient record management.
 - Optimized recognition performance by improving pipeline efficiency.
- **Sahya Stream – Donation Management Platform (IBM Hackathon) Tech: HTML, CSS, JS, Database, Authentication**
 - Created a donation platform with multi-role login and secure fund tracking.
 - Implemented admin workflows for transparent fund approval and distribution.
 - Enhanced user experience using intuitive UI/UX techniques.
- **Data Analytics Projects Tech: SQL, Excel, Power BI, Tableau**
 - Processed and cleaned datasets from diverse domains.

- **Developed** dashboards and visualizations to highlight business KPIs.
- **AI & DS Mini Projects**
 - **Implemented** A*, BFS, DFS, AO*, Best First Search, 8-Queens, and Water Jug algorithms.
 - **Developed** Alpha-Beta pruning, reasoning systems, and analytical visualizations using Pandas.

RESEARCH & ACHIEVEMENTS

- **Co-authored** a published research paper titled: “**Edge-Based Face Recognition for Patient Identification in Government Hospitals.**”
- **Won First Prize** in the “Error Extermination Extravaganza” debugging competition.
- **Supported** national-level hackathon events through technical and operational contributions.

EDUCATION

- **B.Tech – Artificial Intelligence & Data Science (Ongoing)** Velagapudi Ramakrishna Siddhartha Engineering College (Jul’23 – May’27) • **CGPA: 8.60/10**
- **Intermediate (MPC)** Sri Chaitanya Junior College (Jul’21 – May’23) • **967/1000**
- **Class X** Ushodaya E.M & T.M High School (Jul’20 – Mar’21) • **592/600**

CERTIFICATIONS

- NPTEL: DBMS, R Programming, Privacy & Security in Social Media
- Internship Studio: Data Analytics Internship
- GeeksforGeeks: Full Stack, Python
- Coursera: Introduction to AI
- Cisco: Linux Essentials, Python, Cybersecurity
- Eduskills: Web Development with Python

LANGUAGES

- English
- Hindi
- Telugu

HOBBIES

- Listening to Music
- Playing Games
- Watching Movies
