Objective

Artificial Intelligence and Data Science undergraduate seeking opportunities to apply analytical, programming, and problem-solving skills to build efficient software and data-driven solutions. Interested in contributing to impactful projects involving AI, data analytics, and scalable systems.

Education

Velagapudi Ramakrishna Siddhartha Engineering College
B.Tech – Artificial Intelligence & Data Science 2023 – 2027
CGPA: 8.59 / 10

Sri Chaitanya Junior College
Intermediate (MPC) 2021 – 2023
Marks: 961 / 1000 (96.1%)

Ushodaya E.M & T.M High School
SSC 2021
Marks: 592 / 600 (98.67%)

Technical Skills

Programming Languages: Python, C, R, JavaScript, SQL
AI / Machine Learning: Pandas, NumPy, Matplotlib, OpenCV, Qiskit
Data Analytics: Excel, Power BI, Tableau
Web Development: HTML, CSS, JavaScript
Databases: SQL, MongoDB, PL/SQL, SQLite
Tools: GitHub, Visual Studio, Streamlit, UiPath, Unity, Overleaf

Internship Experience

Data Analytics Intern 2024
Internship Studio

- Cleaned and analyzed datasets using Python, SQL, and Excel to extract actionable insights.
- Developed interactive dashboards using Power BI and Tableau to visualize key performance indicators.
- Improved data interpretation and reporting through collaborative analysis and visualization.

AICTE – EduSkills Virtual Internship Program Jan 2026 – Mar 2026
Domain: Data Structures and Algorithms in C

- Completed a 10-week virtual internship covering core and advanced data structures using C.
- Implemented arrays, linked lists, stacks, queues, trees, and graph-based algorithms.
- Applied algorithmic paradigms including searching, sorting, recursion, and optimization techniques.
- Developed a capstone project demonstrating practical implementation of data structures and algorithms.
- Participated in weekly assessments, documentation, and final evaluation to strengthen coding and problem-solving skills.

Projects

Edge-Based Face Recognition System

- Developed a real-time face recognition system using Python and OpenCV for automated patient identification.
- Integrated SQLite database to manage patient records efficiently.
- Improved recognition speed and accuracy through optimized processing pipelines.

Sahya Stream – Donation Management Platform

- Designed a web-based donation management platform with multi-role authentication.
- Implemented secure fund tracking and approval workflows for transparent operations.
- Developed responsive UI using HTML, CSS, and JavaScript.

Quantum State Visualizer

- Built an interactive quantum state visualization tool using Python, Qiskit, and Streamlit.
- Implemented Bloch sphere rendering to interpret quantum states visually.

Certifications

- DBMS – NPTEL
- R Programming – NPTEL
- Privacy and Security in Social Media – NPTEL
- Introduction to Artificial Intelligence – Coursera
- Python Essentials – Cisco
- Cybersecurity Essentials – Cisco
- Linux Essentials – Cisco
- Full Stack Development – GeeksforGeeks
- Python Programming – GeeksforGeeks
- Web Development with Python – Eduskills
- Data Analytics Internship – Internship Studio
- Quantum Fundamentals Program – WISER
- Data Engineering Virtual Internship – AICTE

Research & Achievements

- Co-authored research paper: *Edge-Based Face Recognition for Patient Identification in Government Hospitals*.
- Winner – **Error Extermination Extravaganza** debugging competition.
- Contributed to organization and coordination of national-level hackathon events.

Extracurricular Activities / Interests

Problem Solving, Exploring AI and Data Science Technologies, Playing Strategy Games, Listening to Music

Languages

English, Hindi, Telugu
